Summary

Computer Science Graduate (GPA 88): Strong academic background from SCE with excellence in Data Structures, Algorithms, and Systems Programming.

Versatile Developer: Practical experience in Full-stack development (React, Node.js) alongside Deep Learning research (PyTorch, SNN, Signal Processing)

AI-Native xEngineer Mindset: Passionate about end-to-end ownership, from system design to production. Experienced in leveraging AI-assisted tools (Cursor, Claude Code) to enhance code quality, architectural integrity, and rapid delivery.

Tech Skills

Languages: Python, Java, C++, JavaScript (ES6+), HTML5, CSS3.

Development Tools & AI Workflow: Expert use of Cursor and Claude Code for rapid development, with a focus on critical evaluation of AI outputs for security and scalability. Proficient in Git, Docker, and IntelliJ.

Frameworks & Libraries: React, Node.js, PyTorch, TensorFlow

Professional Projects

Deep Learning for Seizure Detection (Final Project): Owned the end-to-end architecture for classifying EEG signals to detect epileptic seizures. Implemented and optimized SNN and CNN+LSTM architectures, focusing on system scalability and real-world application while maintaining high accuracy.

Social Media Management Platform: Designed and developed a responsive, professional website for a business using React. Implemented features for portfolio display and automated client lead generation, taking complete ownership from initial requirements to deployment.

RoBERTa AI Text Classification (Python, NLP): Developed a RoBERTa-based classifier to distinguish between AI-generated and human-written text, leveraging pre-trained language models for high accuracy.

BFS Pathfinding Client-Server Application (C++): Developed a multithreaded C++ client-server application for shortest pathfinding using BFS, incorporating caching to optimize query efficiency.

Military Service

Strategic Communication Platoon Commander (Rank: Sargent-Major): Managed and commanded the Strategic Communication Platoon in the "Hoshen" unit. Led technical teams and operated complex communication infrastructures, demonstrating the ability to own and deliver critical outcomes under pressure.

Education

B.Sc. in Computer Science, SCE Academic College of Engineering (2022 – 2025): GPA 88.

Key Courses: Data Structures (95), Computer Systems Architecture (96), Systems Programming (93), Machine Learning (86).

Employment and volunteering

Logistics Team Leader – HP Indigo (2019 – 2021): Managed ink production logistics in a high-scale factory, leading a team and ensuring operational efficiency under pressure.

Perach Scholarship Mentor (2024 – Present): Providing academic guidance and personal mentorship to students.

Languages: Hebrew – Native | English – Proficient | Russian – Native.
